

2004 Poor Performing Circuits

Feeder	Division	Town(s)	SAIFI 2004	SAIDI 2004	Worst 10 % SAIFI 2003	Worst 10 % SAIFI 2004	Worst 10 % SAIDI 2003	Worst 10 % SAIDI 2004	Exceeds 300% Average SAIFI 2003	Exceeds 300% Average SAIFI 2004	Exceeds 300% Average SAIDI 2003	Exceeds 300% Average SAIDI 2004	Corrective Actions
101L6	Bay State South	Nantucket	3.12	135.31	✓	✓			✓	✓			This feeder has had three tree related interruptions that have significantly increased the SAIFI index. Portion of the mainline circuit path is lined with historic elm trees which the Town has allowed only minimum trimming. Automatic reclosing will be added to the circuit protection scheme to reduce the impact of transient limb and branch contacts. Efforts will continue to secure approval to remove hazard trees and limbs whenever identified.
